About Jeju Island

Located southwest of the Korean Peninsula, Jeju Island is a popular tourist destination among domestic and international travelers alike for its beautiful and pristine natural scenery.

Jeju Island is a unique place worldwide, holding the honors of the natural science area such as UNESCO World Biosphere Reserve [2002], UNESCO World Natural Heritage Site [2007] and UNESCO World Geoparks Network [2010]. Jeju Island also consists of all elements for global natural sight theme, including island, volcano, waterfall, beaches, national park, cave and forest.

Also, the reason why Jeju was able to be settled as the best place for the conference is its geographical position. Being located at the center of Northeast Asia, there are direct flights to Jeju from hub airports of the major cities in Northeast Asia. For domestic flight, more than 200 flights are available each day (round-trip).

Welcome to the Jeju Island and hope to enjoy the beautiful place!
